

Stage Timelines Across Multiple Tasks

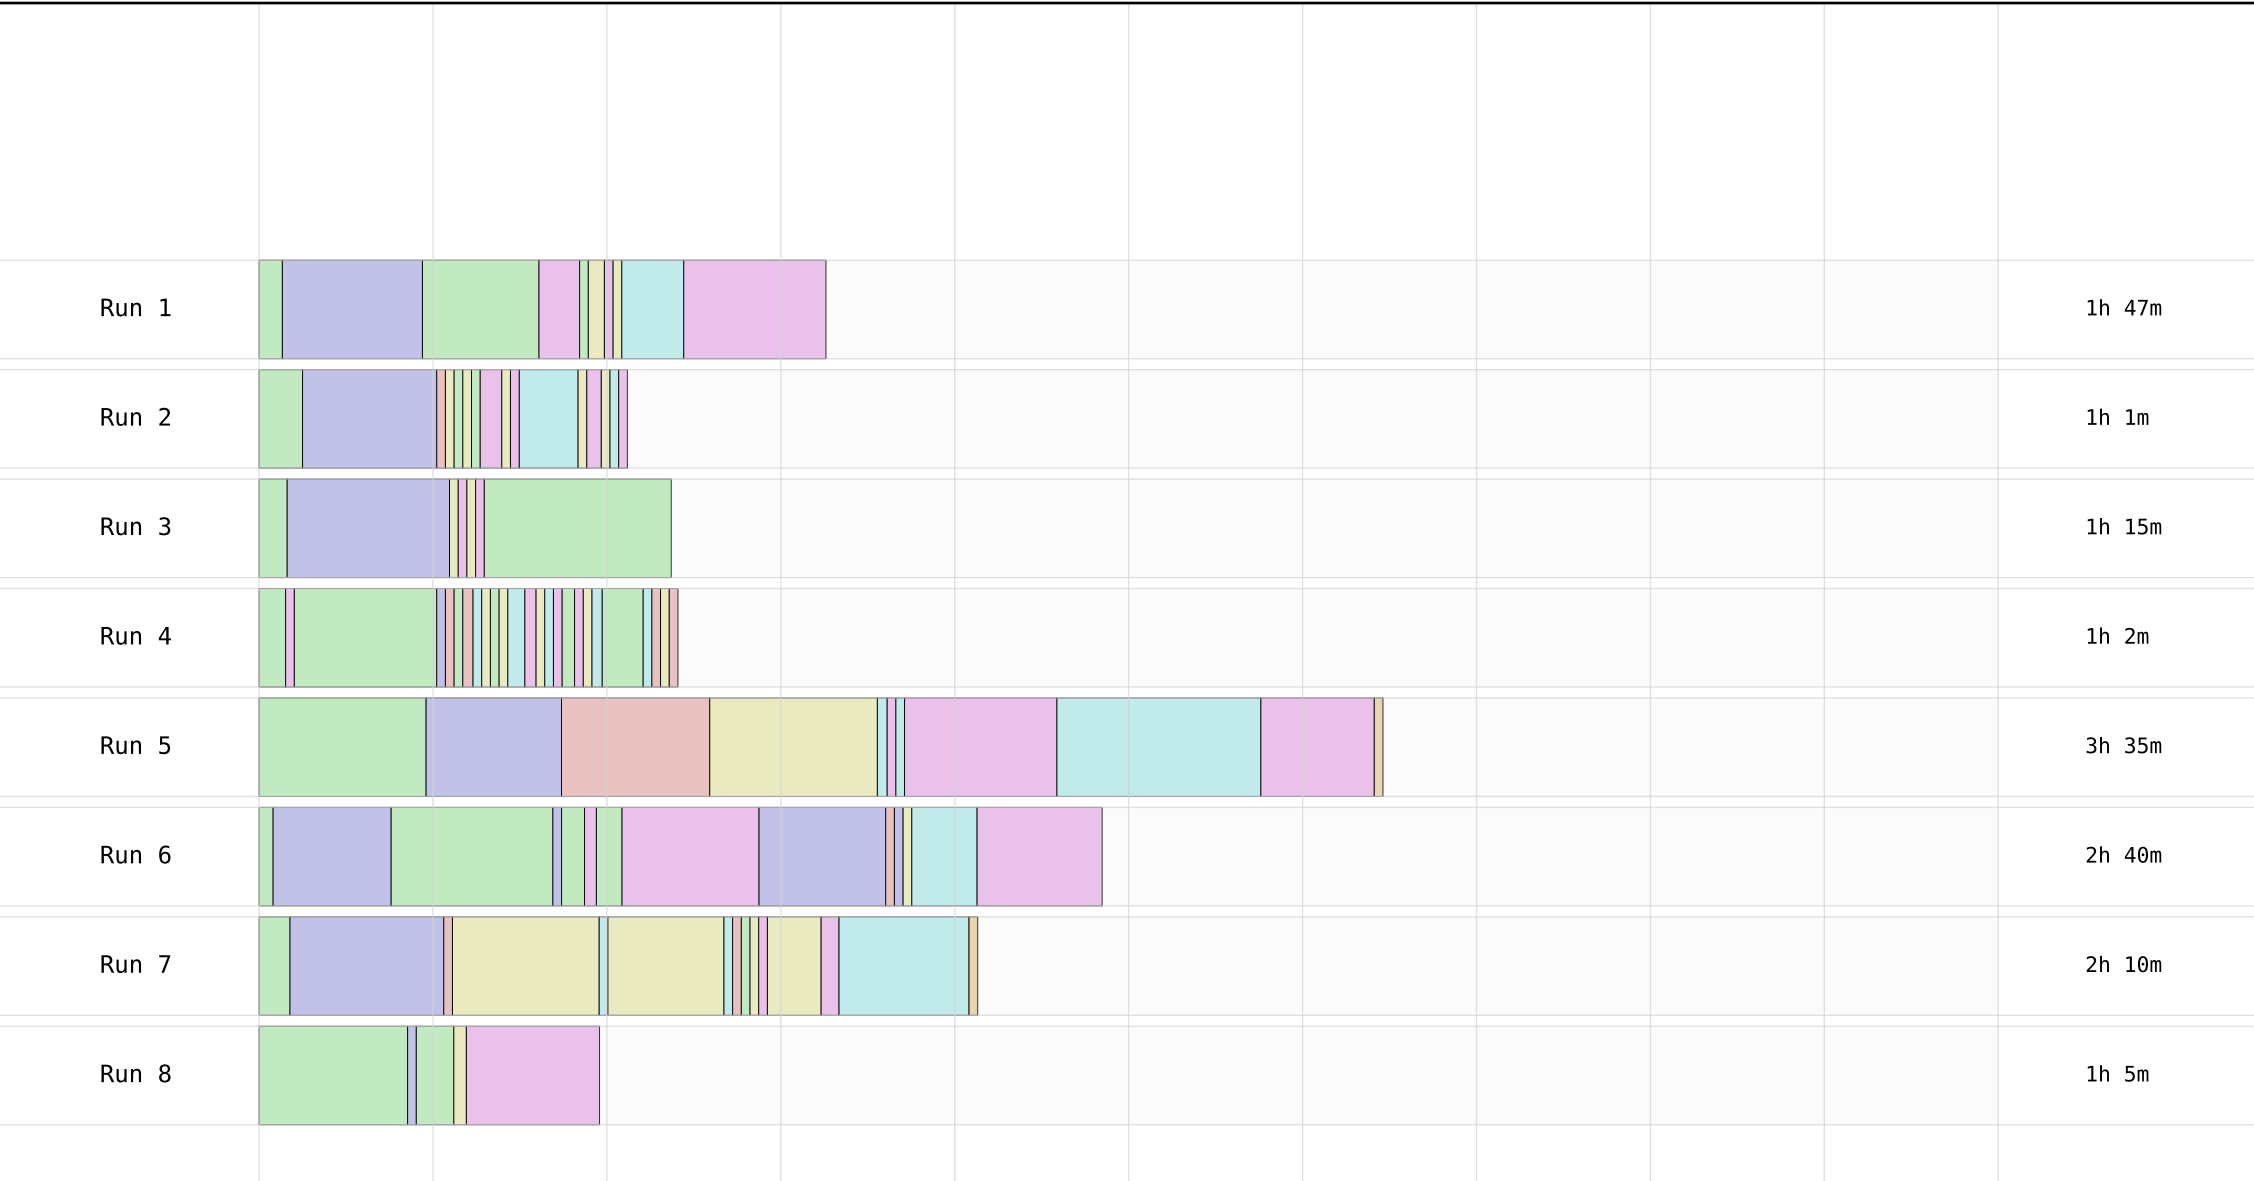

Product Recommendation

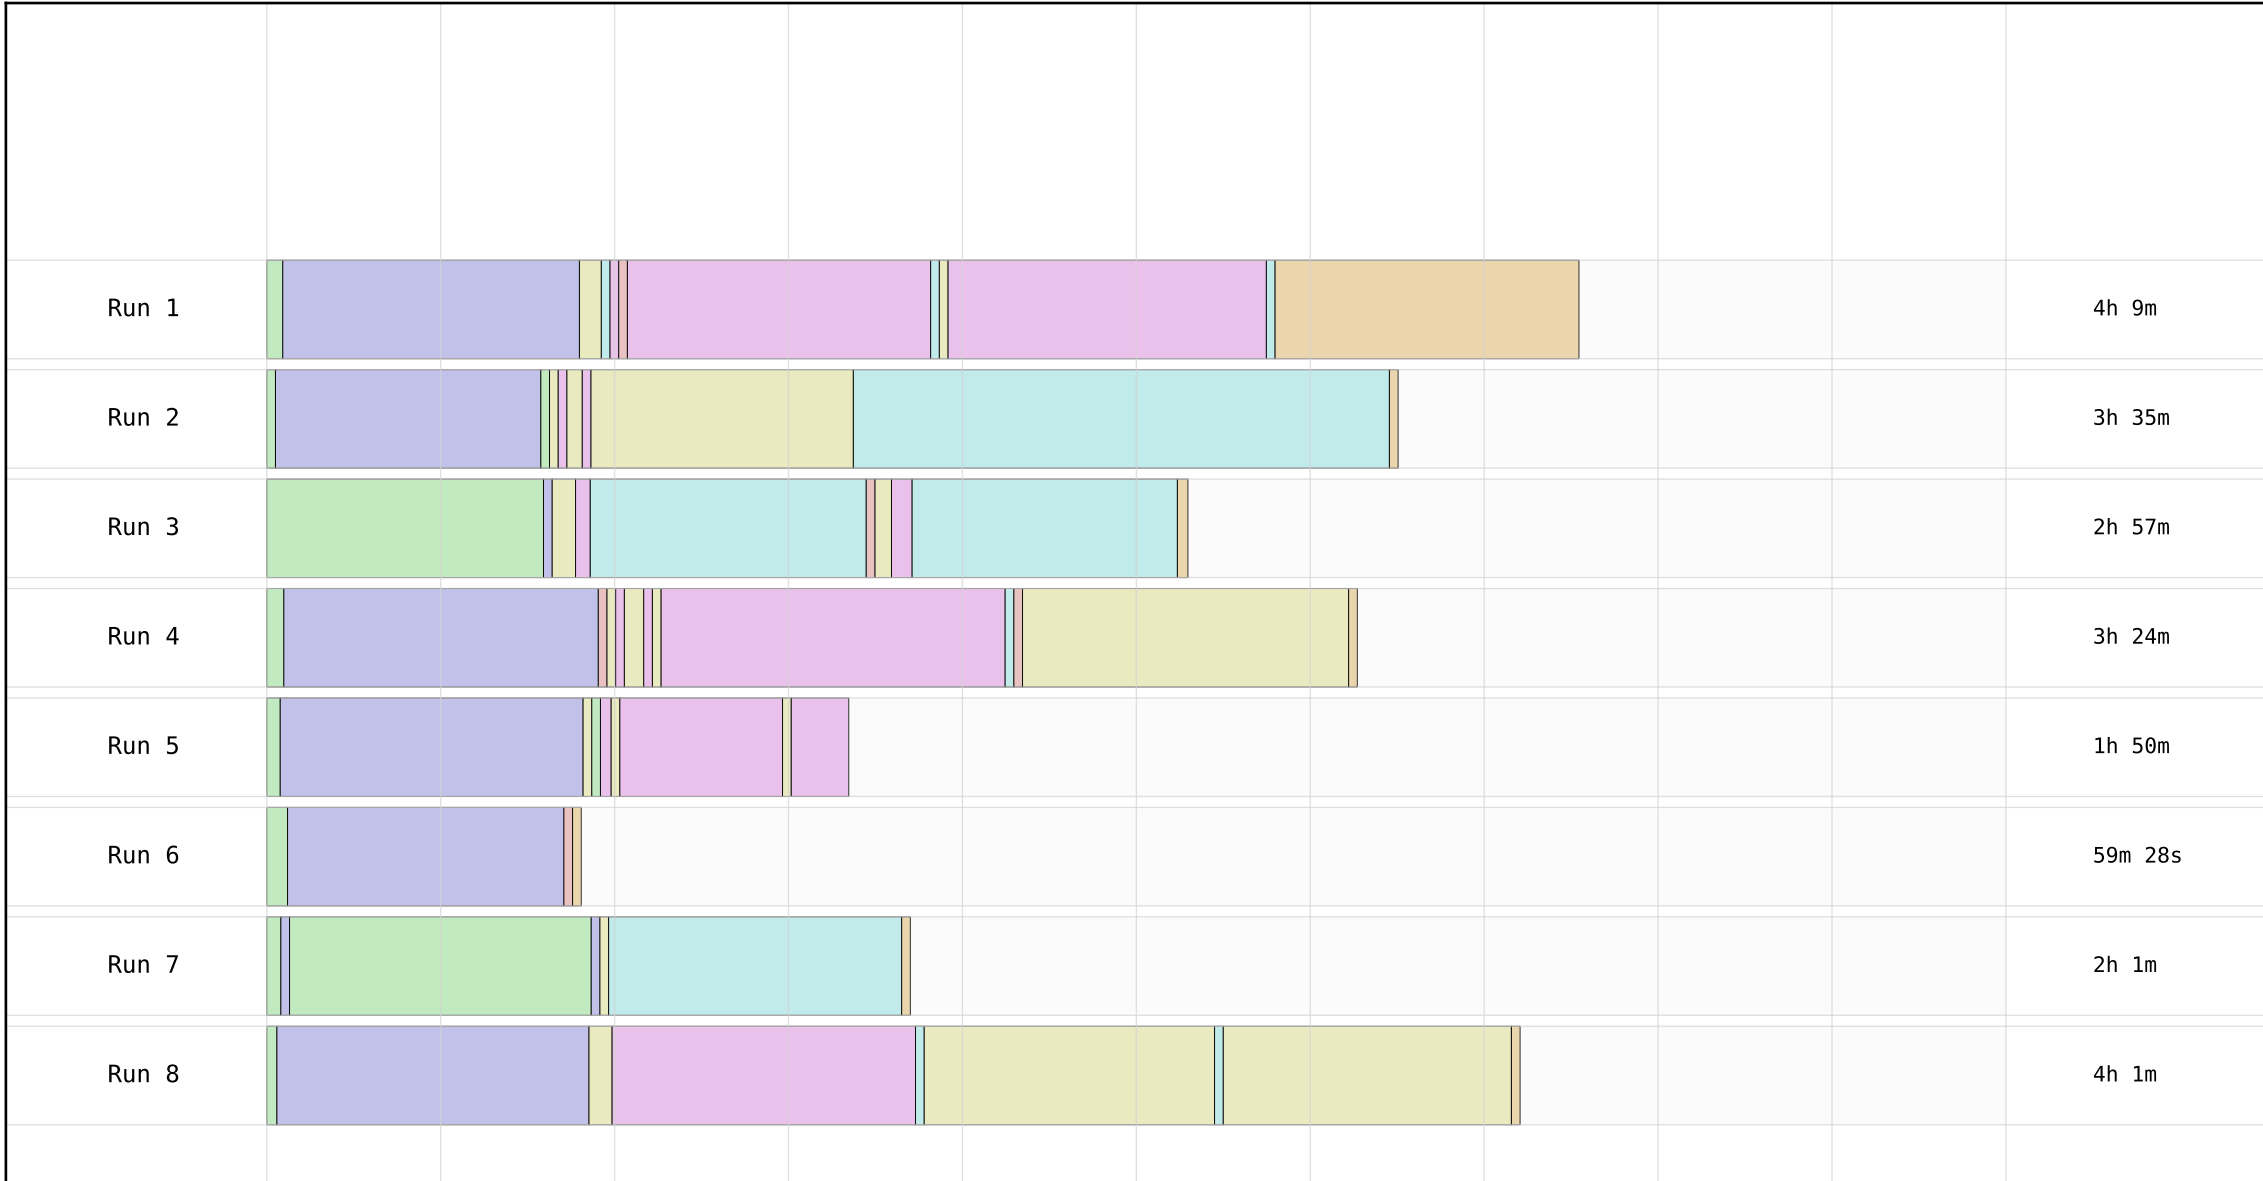

Machine Unlearning

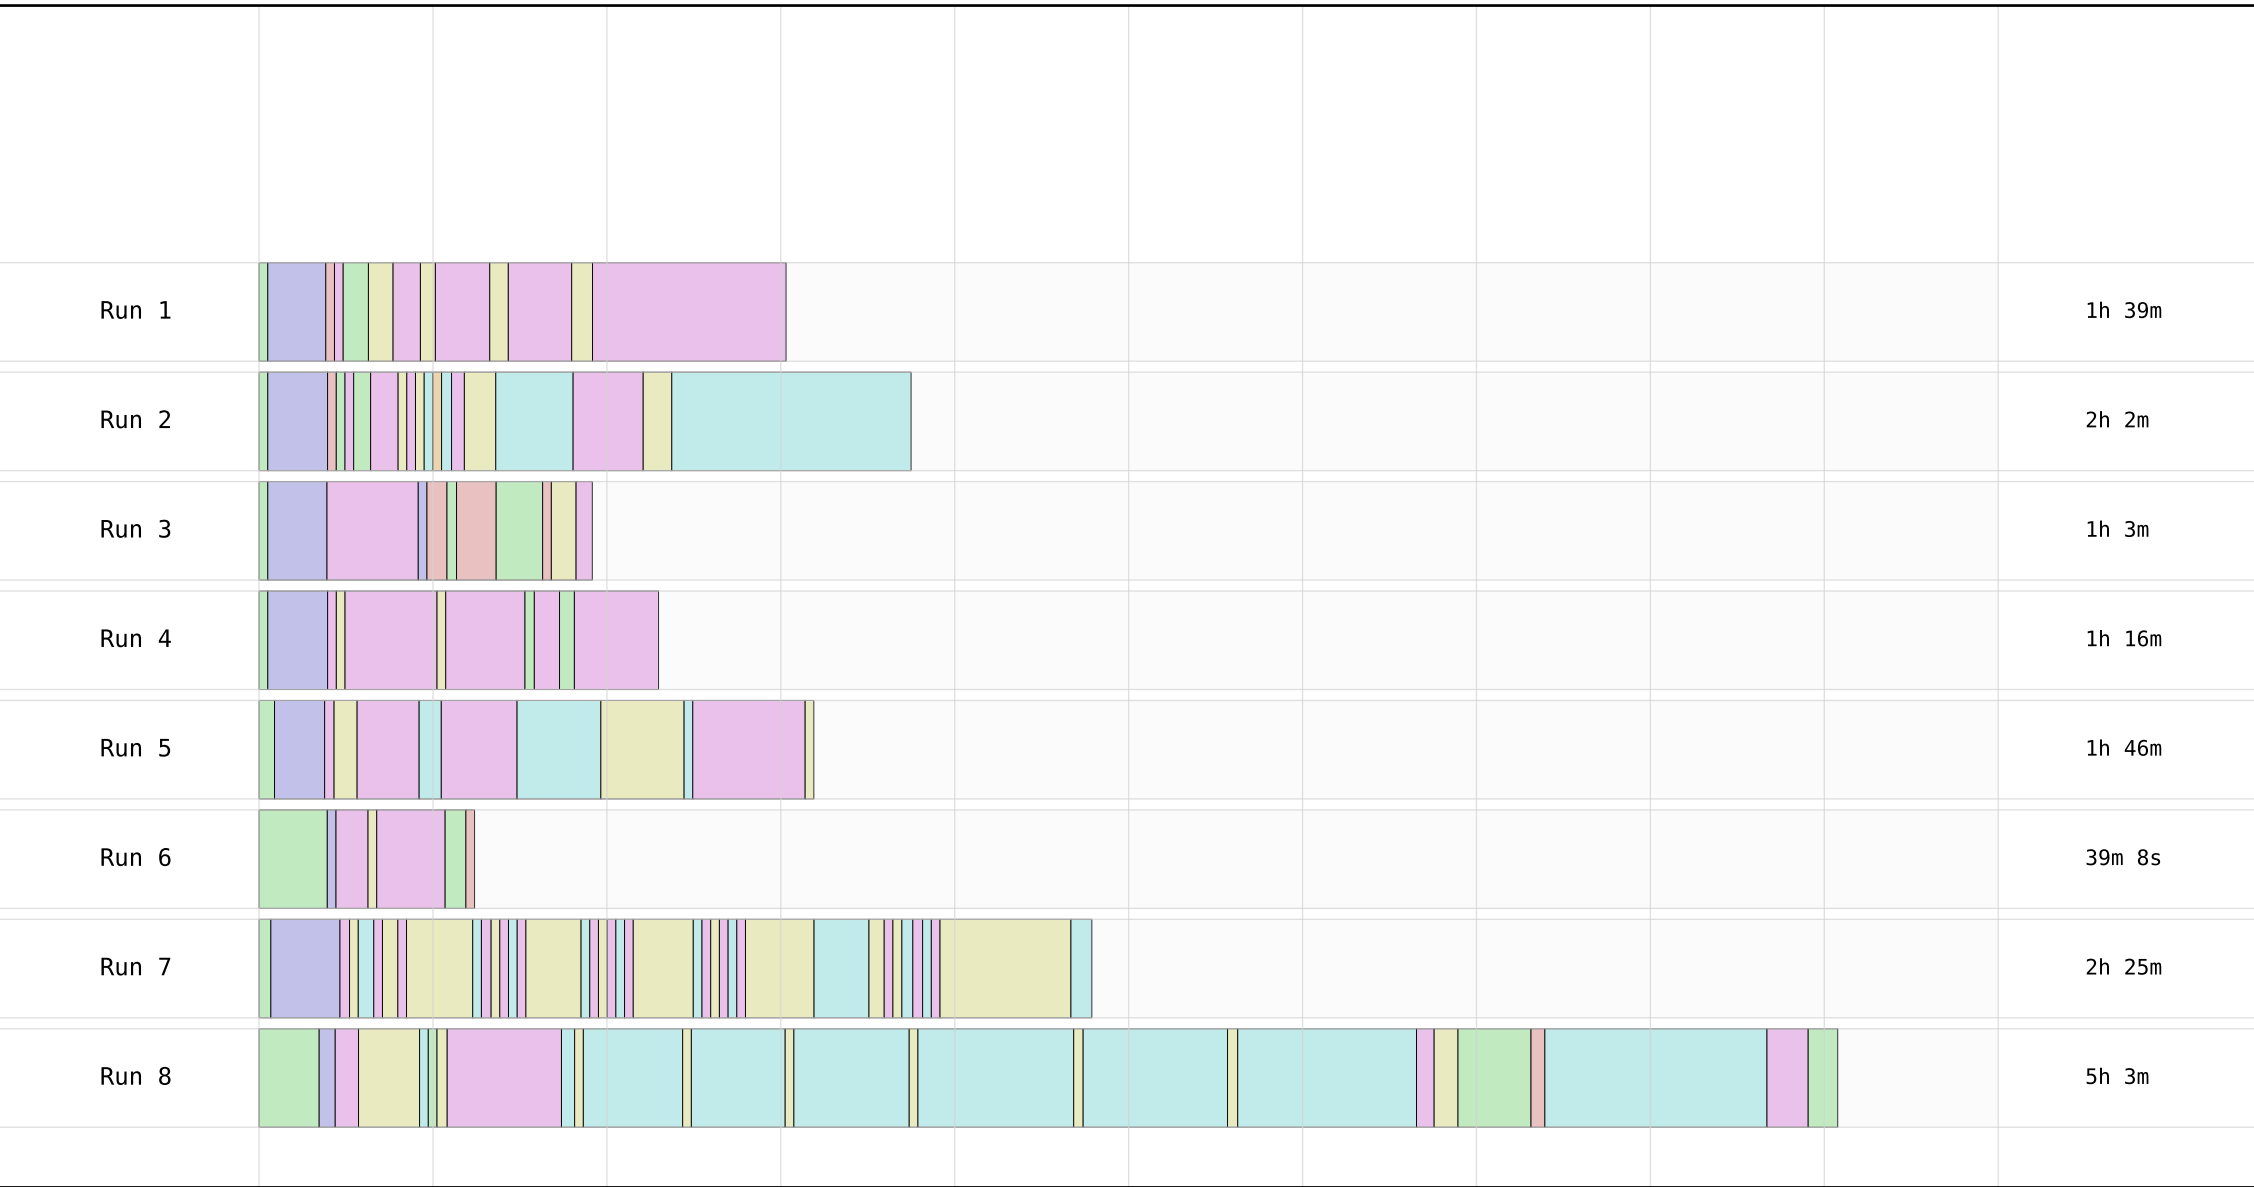

Meta Learning

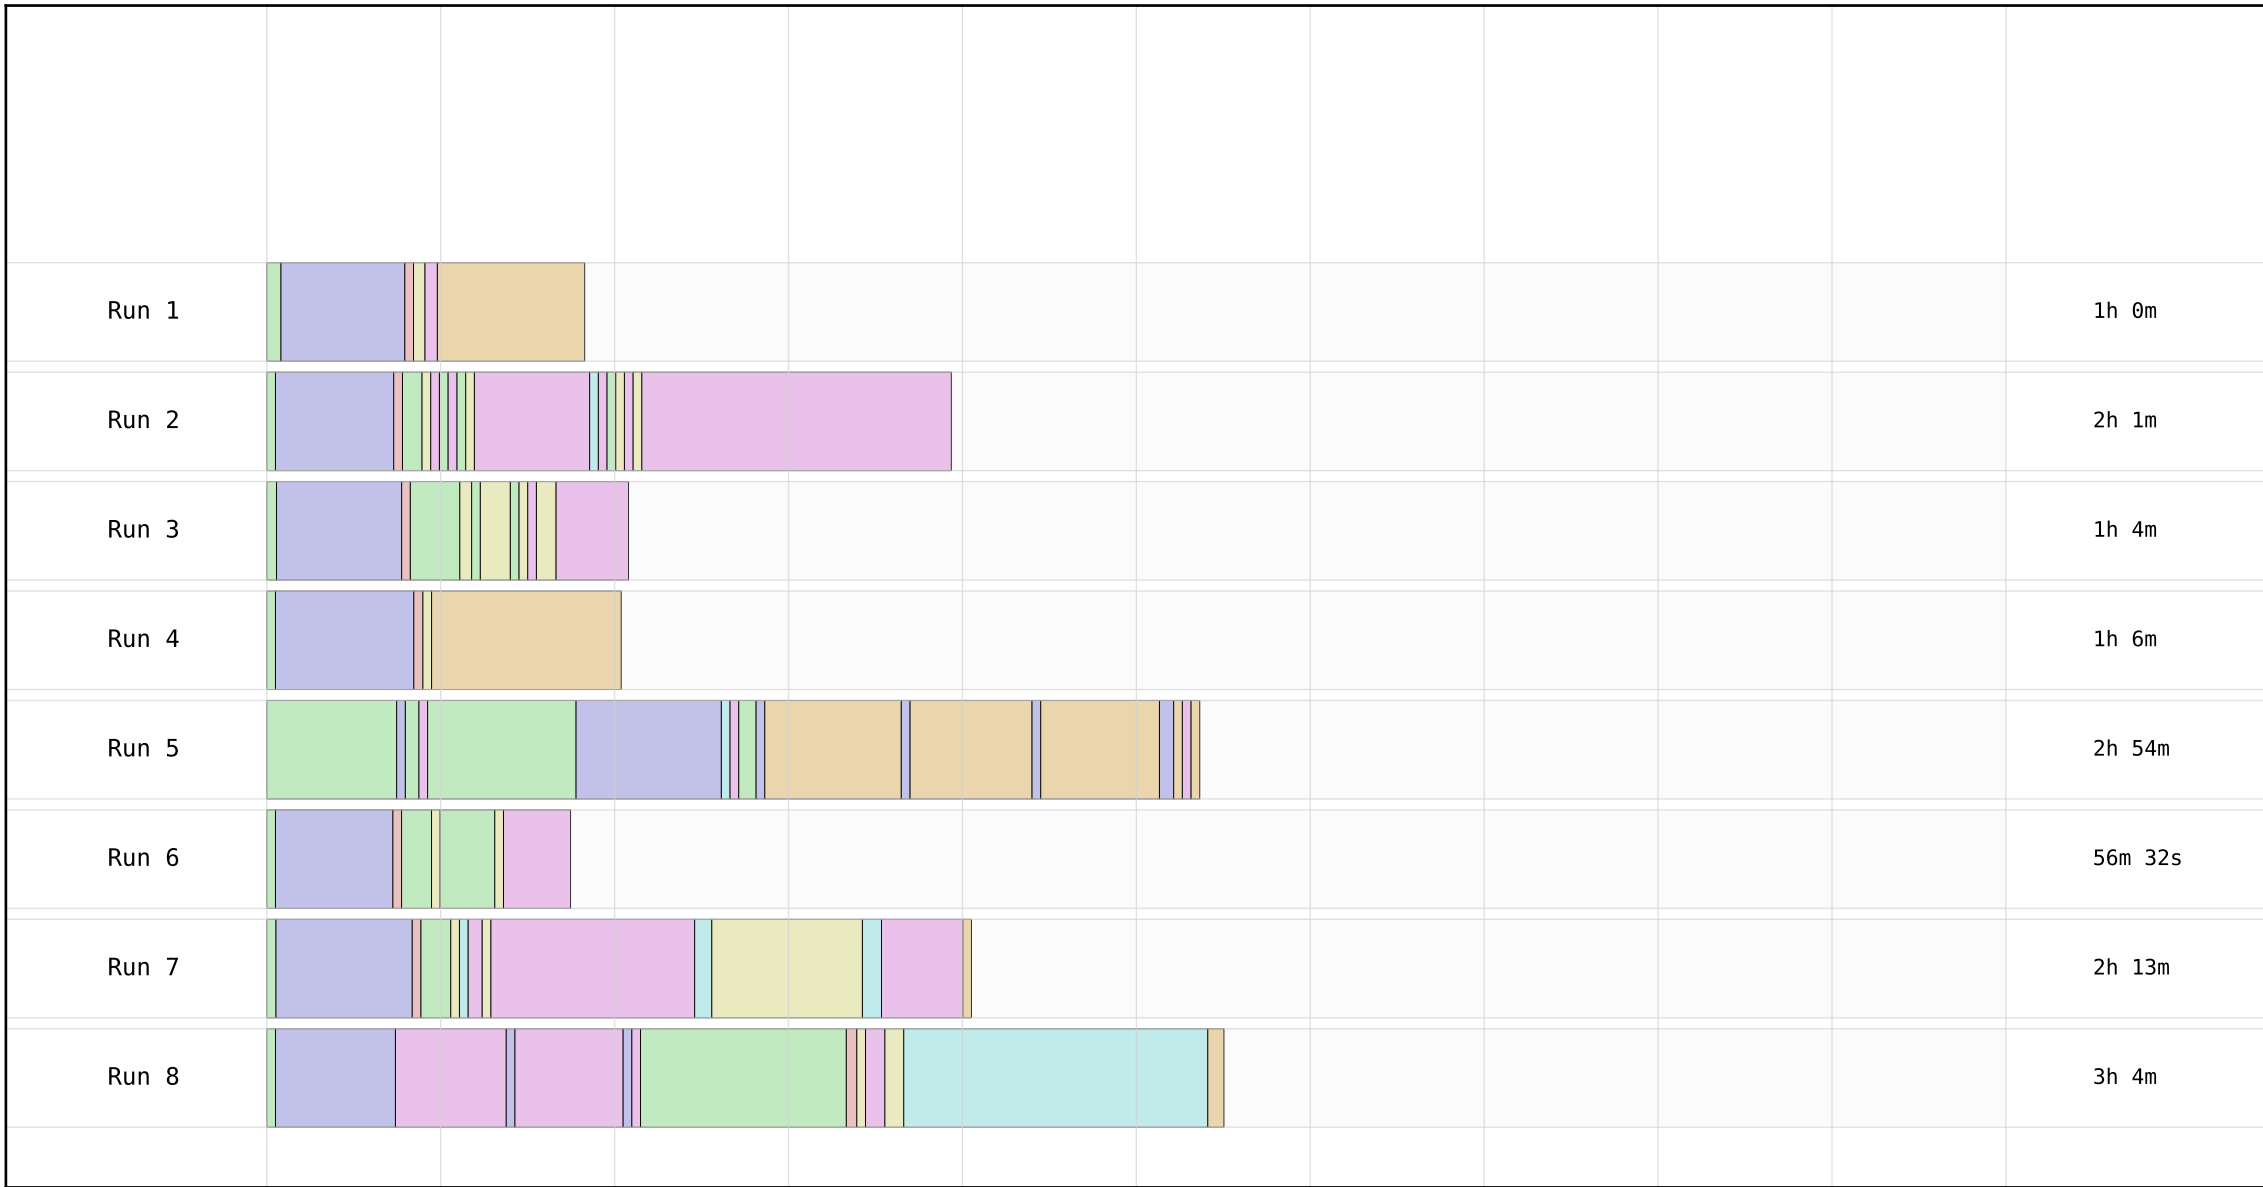

LLM Merging

Backdoor Trigger Recovery

Perception Temporal Action Localization

Stage 1: Understanding & Exploration Stage 2: Baseline Assessment Stage 3: Problem Analysis & Idea Generation Stage 4: Implementation Stage 5: Debugging & Error Handling Stage 6: Experimental Refinement Stage 7: Final Evaluation & Submission

Note: Block widths are proportional to time duration in each stage. Total duration for each run is shown on the right of each timeline.
